NOTE FOR: DDR&E Task Force  
FROM: DDR&E/ICS  
SUBJECT: Los Alamos Briefing

1. I heard an interesting briefing today by two officers from Los Alamos National Laboratories. The subject was their exploitation of some sensitive intelligence information. This presentation is an excellent example of multidisciplinary analysis; the work highlights the value of multidisciplinary handling of collection requirements.

2. [ ] of PBO set up this session using a note from Los Alamos. The note described what the briefing was all about. My understanding is that [ ] provided you a copy and invited you to the presentation.
